

N.E.A.T - FLAPPY BIRDS

- Aman Sharma - B2021005
- Davis John - B2021016
- Luv Saxena - B2021023
- Manali Hedao - B2021025
- Sumit Grover - B2021048

Initial Game Setup

```
35 def draw_window(win, bird):
36     win.blit(BG_IMG, (0,0))
37     bird.draw(win)
38     pygame.display.update()
39
40
41 def main():
42     bird = Bird(200,200)
43     win = pygame.display.set_mode((
44     clock = pygame.time.Clock()
45
46     run = True
47     while run:
48         clock.tick(30)
49         for event in pygame.event.get():
50             if event.type == pygame.QUIT:
51                 run = False
52
53         bird.move()
54         draw_window(win, bird)
55
56     pygame.quit()
57     quit()
58
59 main()
```

game 1.9.4

- Introducing the clouds, floor and the bird
- Animating the bird to move its wings

- Adding the falling & the jumping functionality

- Looping over & maintaining the environment state

Environment Setup

- Animating bird & floor to resemble gameplay
- Generating pipes, while calculating random heights with enough space for jump
- Looping over & maintaining the environment state

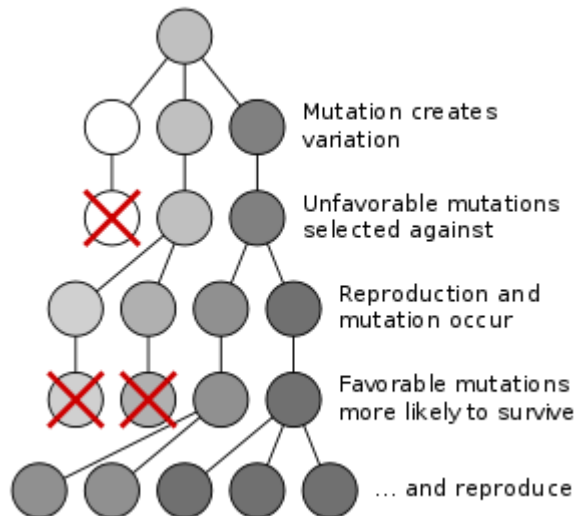

NEAT

NeuroEvolution of augmenting topologies

“Survival of the Fittest”

N.E.A.T

- “Neural Networks through Augmented Topologies” - describes algorithmic concepts of self-learning machines that are inspired by genetic modification in the process of evolution.

Genome (Genotype)

Node Genes

Node 1	Node 2	Node 3	Node 4	Node 5
Sensor	Sensor	Sensor	Output	Hidden

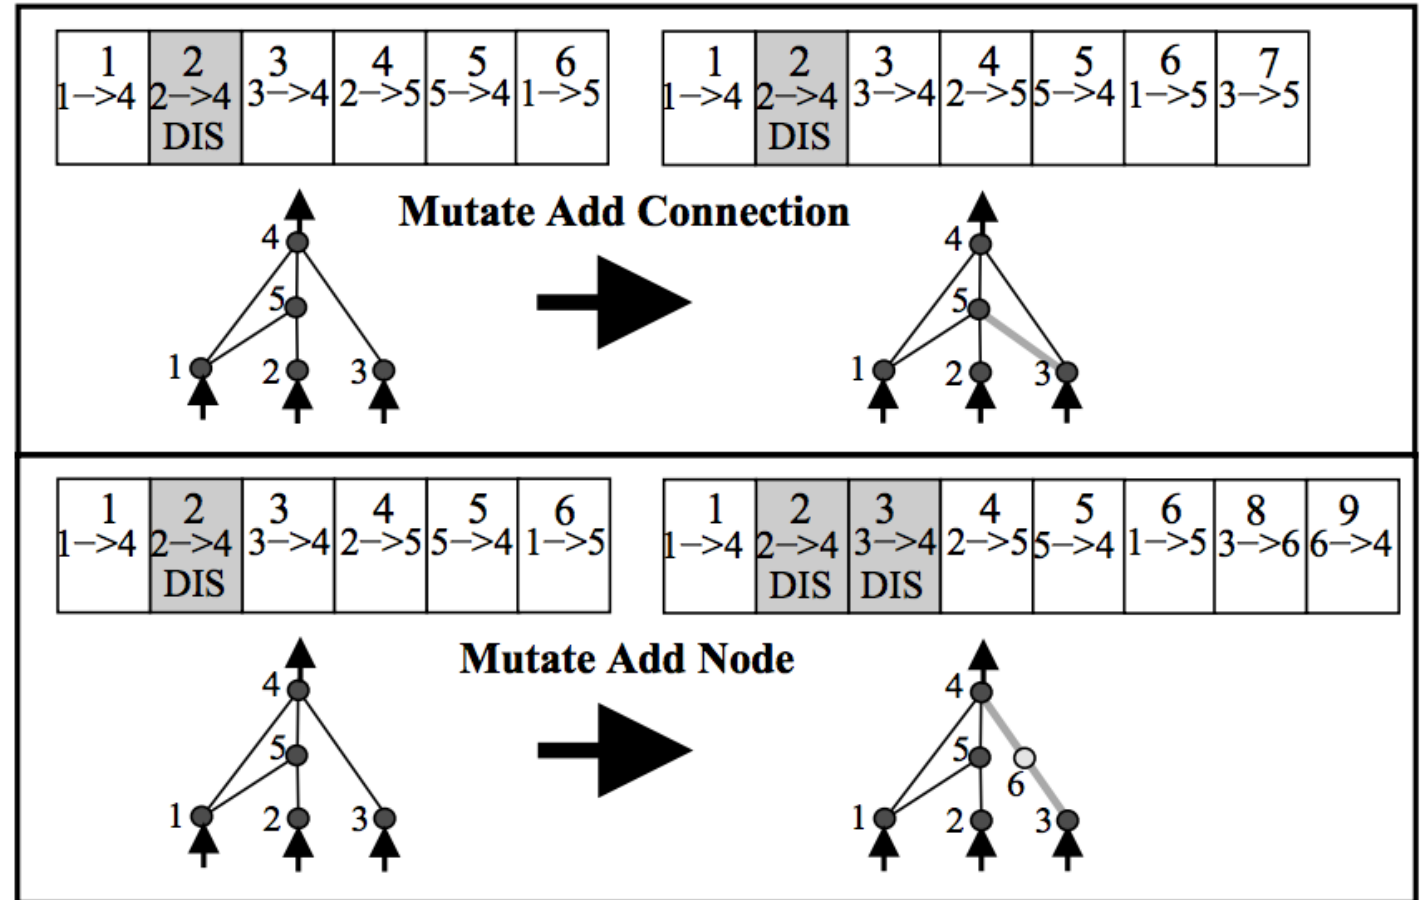

Connect. Genes

In 1	In 2	In 3	In 2	In 5	In 1	In 4
Out 4	Out 4	Out 4	Out 5	Out 4	Out 5	Out 5
Weight 0.7	Weight-0.5	Weight 0.5	Weight 0.2	Weight 0.4	Weight 0.6	Weight 0.6
Enabled	DISABLED	Enabled	Enabled	Enabled	Enabled	Enabled
Innov 1	Innov 2	Innov 3	Innov 4	Innov 5	Innov 6	Innov 11

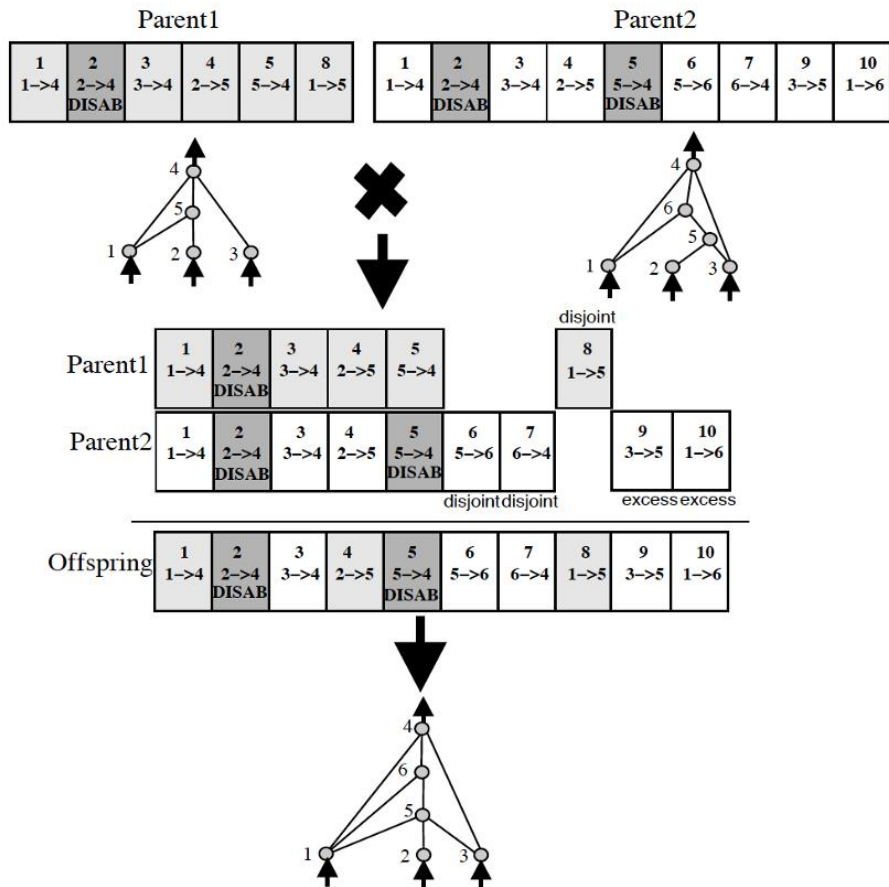

Network (Phenotype)

N.E.A.T – Mutation Explained

Competing Conventions & Speciation

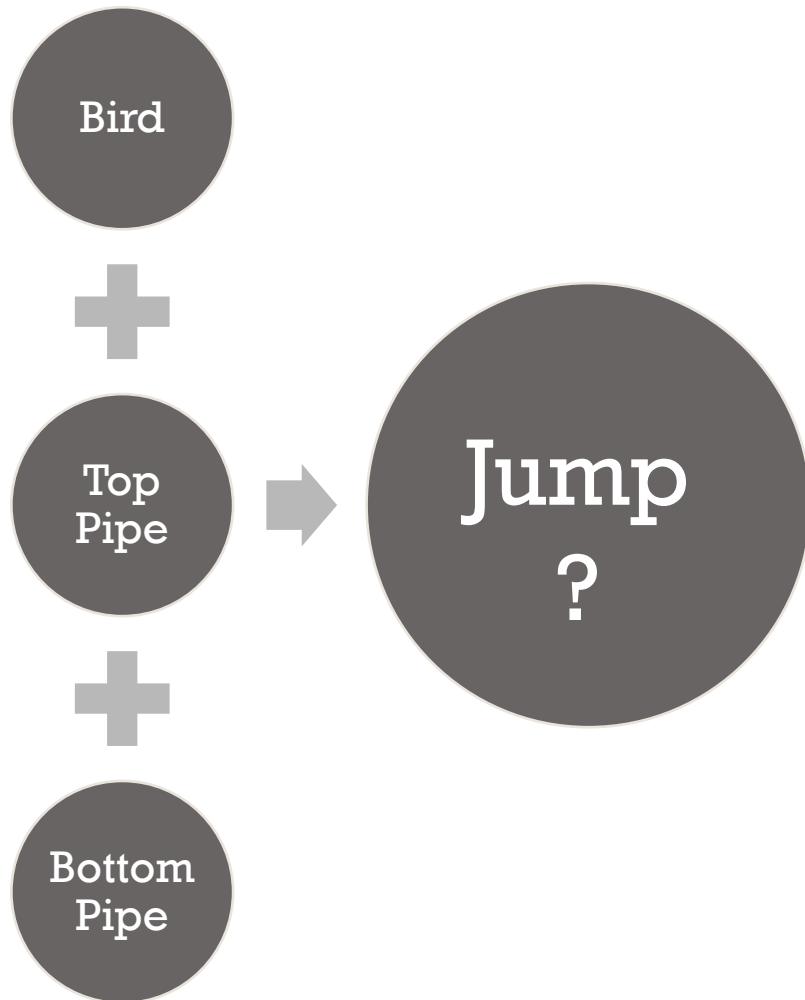

“Blindly crossing over the genomes of two neural networks could result in networks that are **horribly mutated and non-functional**. If two networks are dependent on central nodes that both get **recombined out of the network**”

“Adding new connection or node before any optimization of weights have occurred often leads to a lower performing individual.”

Explicit fitness sharing
